Mountjoy Chilton Medley LLP Healthcare Services Team provides the best of both worlds – the depth and breadth of resources normally only available from national firms, combined with the personal service, proactivity, care and commitment most often associated with local firms. We offer specialized management services for more than 100 physician practices throughout the region and more hospital audit experience than any other firm in Kentucky. With our national expertise in Recovery Audit Contracting, Medicaid Integrity Program audits and hospital outpatient services, you'll find that MCM's business experience and passion for helping clients succeed is unlike any other.

Our commitment to healthcare industry clients extends well beyond traditional accounting services. In addition to consulting and planning engagements, we've assisted our clients with mergers and acquisitions, financing, employee benefits, tax planning, real estate, legal matters and organizational structure, to name a few.

With consultants and finance experts who have both healthcare business and clinical backgrounds, you can count on us to handle the critical business components of your healthcare organization while you focus on providing the care your patients deserve.
