Fraud and Forensic Accounting Services

Businesses of all types and size can be vulnerable to fraud. The average fraud committed against a small business goes on for 18 months before it is discovered and costs the company around \$150,000 on average.

Mountjoy Chilton Medley LLP understands how and where people may take advantage of your business and our team strives to stop fraud before it starts. MCM's Fraud and Forensic Services Team examines internal controls for areas of potential fraud risk, utilizes data mining technology to help identify suspicious activity and provides periodic reviews of an organization's processes to minimize the potential for fraud. Our industry-diverse team maintains nationally recognized professional certifications in fraud examination, financial forensics, valuation and information tech.

MCM also supports attorneys in litigation matters, serving as an expert witness. In the role of expert witness, we manage preparation of reports and exhibits that present facts used in negotiation, deposition, arbitration, mediation or trial.

Don't be a victim of fraud. Let MCM minimize your fraud vulnerability and equip you with the tools to protect your business.
